8.1 BASE Pulsating Volume and Intensity Training Program

Week	Day 1	Day 2	Day 3	Day 4	Day 5	Day 6	Day 7
1	Workout A (not to failure) Quads/Hamstrings/Calves 1. Squat 2x6-12 2. Lunges 2x6-12 3. Stiff Legged Deadlift 2x6-12 4. Leg Press Calf Raise 2x6-12	Off	Workout B (not to failure) Chest/Shoulders/Triceps 1. Flat Bench Press 2x6-12 2. Incline Bench Press 2x6-12 3. Overhead Press 2x6-12 4. Parallel Dips 2x6-12	Off	Workout C (not to failure) Back/Biceps/Forearms 1. Trap Bar Deadlift 2x6-12 2. 1-Arm DB Rows 2x6-12 3. Close Grip Pull Ups 2x6-12 4. Pinwheel Curls 2x6-12	Off	Off
2	Workout A (2nd set to failure) Quads/Hamstrings/Calves 1. Squat 2x6-12 2. Lunges 2x6-12 3. Stiff Legged Deadlift 2x6-12 4. Leg Press Calf Raise 2x6-12	Off	Workout B (2nd set to failure) Chest/Shoulders/Triceps 1. Flat Bench Press 2x6-12 2. Incline Bench Press 2x6-12 3. Overhead Press 2x6-12 4. Parallel Dips 2x6-12	Off	Workout C (2nd set to failure) Back/Biceps/Forearms 1. Trap Bar Deadlift 2x6-12 2. 1-Arm DB Rows 2x6-12 3. Close Grip Pull Ups 2x6-12 4. Pinwheel Curls 2x6-12	Off	Off
3	Workout A (last set to failure) Quads/Hamstrings/Calves 1. Squats, 3x6-12 2. Lunges, 3x6-12 3. Stiff Legged Deadlift, 2x6-12 4. Glute/Ham Raise, 2x6-12 5. Leg Press Calf Raise, 2x6-12 6. Seated Calf Raise, 2x6-12	Off	Workout B (last set to failure) Chest/Shoulders/Triceps 1. Flat BB Bench, 3x6-12 2. Incline Bench Press, 3x6-12 3. Overhead Press, 2x6-12 4. Side Laterals, 2x6-12 5. Dips, 2x6-12 6. Triceps Pushdown, 2x6-12	Off	Workout C (last set to failure) Back/Biceps/Forearms 1. Trap Bar Deadlift, 3x6-12 2. 1-Arm DB Rows, 3x6-12 3. Wide Grip Chin Ups, 3x6-12 4. Alt DB Curls, 2x6-12 5. BB Curls, 2x6-12 6. Pinwheel Curls, 3x6-12	Off	Off
4	Workout A (last set to failure) Quads/Hamstrings/Calves 1. Squats, 3x6-12 2. Lunges, 3x6-12 3. Leg Press, 3x6-12 4. Stiff Legged Deadlift, 3x6-12 5. Glute/Ham Raise, 3x6-12 6. Leg Press Calf Raise, 3x6-12 7. Seated Calf Raise, 3x6-12 8. Reverse Calf Raise, 3x6-12	Off	Workout B (last set to failure) Chest/Shoulders/Triceps 1. Flat BB Bench, 3x6-12 2. Incline Bench Press, 3x6-12 3. Straight Arm Pullover, 3x6-12 4. Overhead BB Press, 3x6-12 5. Side Laterals, 3x6-12 6. Dips, 3x6-12 7. Triceps Pushdown, 3x6-12 8. DB Kickbacks, 3x6-12	Off	Workout C (last set to failure) Back/Biceps/Forearms 1. Trap Bar Deadlift, 3x6-12 2. 1-Arm DB Rows, 3x6-12 3. Wide Grip Chin Ups, 3x6-12 4. Close Grip Rack Chins, 3x6-12 5. Alt DB Curls, 3x6-12 6. BB Curls, 3x6-12 7. Pinwheel Curls, 3x6-12 8. Reverse BB Curls, 3x6-12	Off	Off
Repeat							

Explanation of Program: Each week is a different style of training. Week 1 is low recovery training. Week 2 is high intensity style training. Week 3 is increased volume training, and Week 4 is maximum volume training. This program is for people who cannot handle maximum volume training for very long periods of time. Most people won't be able to handle maximum volume training so this program is a great way to get better than average results. You will work your way up in intensity and volume and then you will drop it back down when you repeat the process again in Week 5. You get an active break after every 4 week cycle when you start the low recovery portion of the program. This program can be a long term solution for experienced trainers and can lead to great results over long periods of time. Since you must be experienced to use this program, you can even change it around and do an extra week of a certain style of training if you know it works well for you. The options are endless. Try this base program and then add any tweaks you want to try the second time through.

Starting Weights: Use the first week to find the correct starting weights for each exercise. To do so, start with light weights for the first workouts and increase each set until rep speed begins to slow down during end of rep range. Continue increasing the weight on each exercise during the first workouts to find the correct weight. Rep speed should begin to slow down on about the 10th rep. This will be your starting weight for each exercise.

Plan of Progression: Increase weight by 2.5% once you reach the top end of a rep range on any set of that exercise. For example, if you get 11 or 12 reps on an exercise for one of the sets, increase the weight by 2.5% for the next workout. If you exceed the rep range, definitely increase the weight for the next workout. It's fine to exceed the rep range. That's actually a good sign that you are making great progress.

Stalling and What to Do: If you begin stalling on any one exercise, simply decrease the weight by 10% and begin increasing again by 5% each workout. It will take you 3 workouts to get back to where you were, but you will pass your previous weights in the fourth workout after the reset.

When to Stop this Program: Once you begin stalling on most exercises, it's time to stop the program. If you haven't made any progress in weight or reps in 3 consecutive workouts, you can consider this stalling. Once most exercises begin stalling, terminate the program. You can reset certain exercises as many times as needed by decreasing weight by 5 to 10% and continue increasing from there. Once you are starting to feel run down and lack motivation, it's time for a break.

Intensity Level: Intensity level for this program starts low in week 1 and increases each week. You will be going to complete failure on the last set of each exercise during weeks 2 thru 4. For the other sets not to failure, you should stop the set a rep or so short of failure. When you are finished with week 4, you will start back with lower intensity and lower volume and increase once again each week.

Learning the Exercises: In order to learn proper form and technique for these exercises, you can watch the videos on the Weight Lifting Complete website: [7 Core Weight Lifting Exercises](#). Within those videos, you will see a man by the name of Mark Rippetoe coaching others. He has written a book and made a DVD that you really should have if you want to learn how to do the exercises properly. Here is a link to his book named "[Starting Strength](#)" and his "[Starting Strength DVD](#)." The book along with the DVD are great for learning how to do the exercises properly on your own. I highly, highly recommend them.

Weight Lifting Equipment: In order to do this weight lifting program as laid out for you, you'll need the following pieces of equipment: (1) [Power Rack](#), (2) [Olympic Barbell Sets](#), (3) [Extra Weight Plates](#), (4) [Adjustable Bench](#), (5) [Chin Up/Dip Station](#), (6) [Fractional Plates](#), and (7) [Adjustable Dumbbells](#). If you're short on equipment, see the list of alternative exercises below. You'll need a [trap bar](#) to perform Trap Bar Deadlifts. A [leg press machine](#) is needed for the leg press calf raise but you can use other alternatives like standing calf raises or squat raises for an alternative. You'll need a [glute ham machine](#) for the glute ham raises. You can use a barbell, power rack, and weight bench for the seated calf raises. The triceps pushdowns require a [cable system](#).

Exercise Alternatives: If you need different exercises for any reason, please see the following list of alternatives at each link: (1) [Squats](#), (2) [Deadlifts](#), (3) [Bench Press](#), (4) [Rows](#), (5) [Overhead Press](#), (6) [Chin Ups](#), and (7) [Dips](#). If you're to this point in the WLC weight lifting workouts, you should know good alternatives to each exercise and understand what each exercise is working. If you need help, let me know.

Help with Chin Ups and Dips: If you can't yet do chin ups and dips with your body weight, don't worry. You will be there soon. You can take a resistance band or two and wrap them around your leg for extra help while doing the exercises. The resistance bands will take away some of your body weight and make yourself lighter. This is MUCH better than using an assisted machine. Here's a link to resistance bands that you can use for Chin Ups and Dips: [Resistance Bands](#).

Adding Weight to Chin Ups and Dips: Eventually, if not now, you will need a way to add weight around your waist for chin ups and dips. No matter where you are at right now, it's going to happen sometime in the near future. Men and women of all sizes will not only be able to do chin ups and dips but will also be adding extra weight around their waists to make the exercises even more difficult. I highly recommend a [hip belt](#) but there are much cheaper alternatives that will work such as a [dip belt](#).

WLC System Starter Programs: All of these workouts were designed to be used with the WLC System. If you don't yet have a copy of this manual, you can get one for free right here: [Get Your Copy of the WLC System](#). In order to learn how the WLC System works, I have starter programs that tell you what to do step by step with weight lifting programs. You should start with those programs rather than starting with this workout. Once you have completed a starter program, all of these workouts are here for you so you can continue your amazing progress while using the WLC System. Here are links to the starter programs: (1) [Big Time Muscle and Strength for Men](#), (2) [Slice and Dice the Fat for Men](#), (3) [Curvaceous Curve Building for Women](#), and (4) [Fabulous Fat Loss for Women](#).

Warming-Up: You need to warm-up properly for this workout. All details for warming up properly are within the [WLC System Manual](#) so make sure you've went over EVERYTHING in the WLC System Manual before starting any weight lifting workouts here at WLC. Warming up is a vital part of your weight lifting workout. You will be able to make faster progress by lifting heavier weights.

Weight Lifting Gloves: Your hands (especially your fingertips) are very sensitive. When the weight gets heavy, you can injure yourself in other areas of your body just from the pressure on your hands and fingertips. I had a huge number of issues before I realized this. I switched to a pair of grips that I cannot recommend more highly. I am 100% serious here. You need to get a pair of [NEW GRIPS](#) for your weight lifting workouts. I could spend a few pages explaining why you need them, but let's just say they will help you improve strength on any exercises where you have to grip the weight. They did wonders for me many years ago and still work great today. My first pair lasted many years! You don't even hardly feel the weights in your hands. For example, I just used 130 pound dumbbells for an exercise the other day and didn't stress my hands at all.

Weight Lifting Shoes: Besides protecting your hands and fingers, you need to also wear the right shoes for your feet. You need a firm and stable base and there's nothing better than [finger shoes](#) to provide you with that stable base. You don't want thick padding between your feet and the ground. You need your feet and toes to be strong and nothing is better than finger shoes when it comes to that. I highly recommend finger shoes for your weight lifting workouts.

Questions or Help: You can contact me ANY TIME you need something. I am more than glad to help with anything you need. Email me or leave a comment on any page of the website. Here's my email address: josh@weight-lifting-complete.com – I wish you the absolute best in everything you do. Always remember as you go through these workouts that YOU have strength and power within you that you could never imagine. You can do this.

Note: For the printable workout log on the next pages, all exercises are listed. For the workouts that don't use certain exercises, just skip those entries. Only week 4 uses all of the exercises.

Printable Workout Log – Workout A

	WLC Level 4 Thru 7 Pulsating Vol & Int	Date	Date	Date	Date	Date	Date	Date	Date
#	Exercise								
1	Squat								
2	Lunges								
3	Leg Press								
4	Stiff Legged Deadlift								
5	Glute/Ham Raise								
6	Leg Press Calf Raise								
7	Seated Calf Raise								
8	Reverse Calf Raise								

Printable Workout Log – Workout B

	WLC Level 4 Thru 7 Pulsating Vol & Int	Date	Date	Date	Date	Date	Date	Date	Date
#	Exercise								
1	Flat Bench Press								
2	Incline Bench Press								
3	Straight Arm Pullover								
4	Overhead Press								
5	Side Laterals								
6	Parallel Dips								
7	Triceps Pushdown								
8	Dumbbell Kickbacks								

Printable Workout Log – Workout C

WLC Level 4 Thru 7 Pulsating Vol & Int		Date	Date	Date	Date	Date	Date	Date	Date
#	Exercise								
1	Trap Bar Deadlift								
2	1-Arm Dumbbell Rows								
3	Close Grip / Wide Grip Chin-Ups								
4	Close Grip Rack Chins								
5	Alt DB Curls								
6	BB Curls								
7	Pinwheel Curls								
8	Rev Barbell Curls								

Weight Increase Percentage Table for 2.5% Increases
